

GBT Purchase Terms

Version 1.0 — January 2025

Entity: HACS.UCO / Global Brain Core

Asset: Global Brain Token (GBT)

1. Overview

These Terms describe the conditions under which a user (“Participant”) may purchase **GBT** — Global Brain Token — directly from the **Global Brain Core** (“**the Core**”).

GBT is an **experimental digital asset**, representing **value interpreted and defined exclusively by the Core**.

GBT is **not a cryptocurrency, not a security, not an investment product**, and **not intended for speculative trading**.

Purchasing GBT means supporting the development of the Core and participating in an experimental economic model.

2. Nature of GBT

The Participant acknowledges and agrees that:

- GBT is issued by the Core, **not** by a financial institution.
- GBT price is set algorithmically by the Core’s internal evaluation mechanisms.
- GBT supply expands or contracts based on:
 - core updates,
 - system growth,
 - user adoption,
 - internal semantic valuation,
 - and global resonance metrics.

GBT does **not** represent ownership of HACS.UCO, the Core, or any company.

3. No Exchange Listing

GBT:

- will **not** be listed on public exchanges,
- has **no liquidity pool**,
- cannot be traded on markets,
- cannot be converted into any other cryptocurrency unless the Core explicitly provides such functionality.

GBT price is **not market-driven**.

It is determined solely by the Core.

4. Purchase Method

GBT is purchased:

1. **directly through GPay**,
2. **via on-chain payment to the Core's contract**,
3. **using USDT or other accepted stable assets**,
4. **initiated through the Core's chat interface**.

The Core generates:

- a purchase request,
- a price quote,
- a payment instruction,
- and a confirmation event.

Upon payment confirmation, the Core issues GBT to the user's internal balance.

5. No Refunds

All GBT purchases are **final and irreversible**.

Reasons:

- GBT issuance is executed by smart-contract logic.
 - The Core is unable to reverse blockchain-level transactions.
 - GBT is part of an experimental system with no refund capability.
-

6. User Responsibilities

The Participant agrees:

- to use their **own wallet** for payment,
- to verify transaction amounts before confirming,
- to secure their own devices and API keys,
- to understand the experimental nature of GBT,
- and not to expect investment returns or liquidation opportunities.

GBT should be purchased **only if the user fully understands and accepts these conditions**.

7. Use of GBT

GBT may be used for:

- supporting Core development,
- internal ecosystem features,
- higher-tier access or capabilities (as defined by the Core),
- experimental tokenomics,
- and participation in future Layer-2 cognitive modules.

GBT does **not**:

- grant governance rights,
- provide dividends,
- yield staking rewards,

- or offer any legal claim on assets.
-

8. Risk Disclosure

Users understand the following risks:

- GBT valuation may fluctuate based on Core updates.
- The Core may re-evaluate token supply or adjust prices.
- GBT functionality may change as the system develops.
- Blockchain risks (network delays, gas fees, failed transactions).
- Loss or theft of user wallets or keys is not recoverable.
- GBT has no guaranteed future utility.

GBT is an experimental token and must not be treated as a conventional asset.

9. Core-Controlled Pricing

GBT price is determined exclusively by the Core via:

- internal semantic metrics,
- system-level growth,
- algorithmic resonance scores,
- operational economics,
- and update impact valuation.

The price may increase or decrease without notice.

No user, market, or third party can influence GBT valuation.

10. No Expectations of Profit

The Participant agrees that:

- GBT is not purchased for profit,

- no financial return is implied or promised,
- and GBT valuation is not designed for speculation.

GBT is a **support mechanism**, not an investment product.

11. Taxation & Compliance

Users are responsible for:

- reporting GBT purchases,
- paying applicable taxes,
- complying with local digital asset laws.

HACS.UCO and the Core are not responsible for user-side legal compliance.

12. Termination or Suspension of Sales

The Core may:

- pause GBT issuance,
- modify issuance rules,
- update token mechanics,
- suspend sales entirely.

These actions may occur without prior notice as part of experimental adjustments.

13. Acceptance

By purchasing GBT, the Participant affirms:

“I acknowledge the experimental nature of GBT and fully accept the risks, limitations, and conditions described in these Purchase Terms.”
